### MOTOR VEHICLES.

*Conditions to be complied with before a Motor Vehicle is registered.*

1. Particulars on application form shall be filled in by applicant.
2. The motor vehicle shall be produced at any time and place appointed by the Superintendent.
3. The motor vehicle shall be capable of being so worked that it may travel either backwards or forwards and be capable of being readily steered.
4. The steering arms and connexion shall be of sufficient length and as far as possible protected from damage by collision.

*Motor Traffic Regulations.*

5. All brake and steering connexions shall be secured with bolts, the bolts shall be fitted with nuts, and the nuts shall be locked or pinned.

6. The motor vehicle shall have two independent brakes in good working order of sufficient strength so that either of them shall be capable of stopping and holding the vehicle under all conditions, and of such efficiency that the application of either shall cause two wheels upon the same axle to be effectually prevented from revolving, or shall have the same effect in stopping the vehicle as if those wheels were so held. Each brake shall be as far as possible so affixed as to be capable of easy adjustment and at least one must be made so as to be applied by the foot of the driver.

No two brakes which operate upon the same part will be considered as independent, and at least one should act upon the road wheels without any connexion with the propelling gears.

r. 11.

11. A suitable attachment shall be securely fastened in an approved position at the front and also at the rear of the motor vehicle, of a size satisfactory to the Superintendent, for the purpose of affixing the number-plates, and a lamp bracket shall be affixed at the rear of the motor vehicle to hold the rear lamp in such a position as to reflect upon the rear number-plate.

The lamp-bracket shall be so affixed as not to obscure any portion of the rear number-plate.

12. An approved bell or alarm, or other means of giving due warning of the approach of the motor vehicle, shall be attached to the motor vehicle in a convenient position.

13. The motor vehicle shall not exceed 8 feet in width, measured between its extreme projecting points.

14. The motor vehicle shall have an efficient silencer so made and affixed that the exhaust shall be projected through the silencer.

15. A side-car shall not be affixed upon the right-hand side of any motor cycle.
